Based on exoskeletons,
providing body stable support while
maintaining comfort and mobility.

XPT[®]
SERIES

PATENT PENDING

**EXCELLENT
COMPRESSION**

**SMOOTH
EDGING**

XPT[®] SERIES are based on exoskeletons and provide stable body support while maintaining comfort and mobility.

XPT[®] SERIES utilizes innovative heat pressing technology to tightly and smoothly bond materials, reducing the protruding feeling of braces and preventing skin irritation on brace edges. This breakthrough technology makes XPT[®] SERIES braces the most comfortable and supportive option on the market, ideal for people with active lifestyles or those who require long-term brace wear.

EXOSKELETON DESIGN

Anatomical-curved design fits and conforms to the human body alignment. It provides stable compression and protection on body as well.

SMOOTH EDGING

Smooth edging decreases skin irritation and increases comfort through innovative heat pressing technology.

EXCELLENT COMPRESSION

Using flexible Lycra or KPU materials for comfort and superior support by maintaining the shape of the brace.
